

Functional Family Therapy
Step-by-Step Process: PHASE THREE of FFT Site Certification

STEP ONE: Site Supervisor Provides Site Oversight and is assigned an FFT Phase Three National Consultant

The site is assigned a Phase Three FFT National Consultant who reviews the CSS database for site/therapist adherence, service delivery trends, and client outcomes. The Phase Three FFT National Consultant provides a monthly call to the Site Supervisor. Therapists and Site Supervisors maintain cases, outcomes and adherence tracking in the FFT CSS system

STEP TWO: One Day On-Site Training/Consultation

The Phase Three FFT National Consultant visits the site to meet with the team, review trends, provide consultation and training topics for the team.

Maintenance Phase

The goal of the third phase of FFT implementation is to move into a partnering relationship to assure on-going model fidelity, as well as impacting issues of staff development, interagency linking, and program expansion. Phase III requirements are renewed annually, and their base of oversight and consultation is considered necessary for a FFT site to remain certified.
